

Electrical and Computer Engineering student at Virginia Military Institute with four years of hands-on technical experience supporting enterprise healthcare systems in a high-reliability environment. Proven leadership through military training, technical problem solving, and team management. Seeking an engineering role where technical aptitude, discipline, and mission focus can contribute to innovative solutions.

EDUCATION **VIRGINIA MILITARY INSTITUTE – ELECTRICAL AND COMPUTER ENGINEERING** *Minor in Applied Mathematics*
Expected graduation: May 2027 | **GPA:** 3.75 | **Major GPA:** 3.875 | **ACT Score:** 33 (34 in Math)
Scholarship and Honors: Merit Scholarship, Institute Honors Program, Dean's List
Relevant Coursework: C/C++ programming, Computer Architecture, Circuits I, Circuits II, Digital Systems Design, Electronics, Digital Logic, Linux, Microcontrollers, Reverse Engineering, Electronic Applications, Signal and System Analysis

Technical Skills
Programming: C/C++, Python, System Verilog, MATLAB, Assembly, Java1/2, ATmega/AVR register-level
Hardware: Embedded Systems Design, FPGAs, Analysis with Benchtop Equipment
Software & Tools: LTspice, Vivado, Linux, Visual Studio code, Ghidra, Active Directory, Service Centra, VMware, Windows server, Networking

Projects
Artificial Beehive – Elephant Deterrence System *VMI 2025*

- Led planning and execution of a six-week embedded systems project utilizing ATmega register-level programming, coordinating a full-class engineering effort from concept through implementation.

CPU Design – 32-bit Pipelined Processor in System Verilog *VMI 2025*

- Designed, implemented, and verified a five-stage pipelined 32-bit CPU using SystemVerilog, strengthening experience in computer architecture and hardware verification.

Using Event based Vision for Non-Invasive Monitoring of Legacy Control Interfaces *Honors Thesis*

- Researching how event-based vision can be utilized and implemented across a broad spectrum of fields to augment or replace human-in-the loop monitoring

Experience
HCA HEALTHCARE – Nashville, TN
TriStar Southern Hills Medical Center Technical Analyst *July 2022 – Present*

- Support mission-critical clinical and enterprise IT systems across hospital and division operations.
- Resolve hardware, software, and network incidents in a high-reliability healthcare environment.
- Partner with clinical and operational teams to implement solutions that improve workflow and reliability.

TriStar Southern Hills Medical Center Intern *March 2022*

Leadership & Activities
ELECTRICAL & COMPUTER ENGINEERING ELECTED CLASS REPRESENTATIVE FOR '27

- Provide guidance and support on academic and departmental matters to underclassmen
- Facilitate communication among students and faculty to improve curriculum, resources, and student experience, and to advocate for student concerns at faculty meetings

CADET LEADERSHIP PROGRESSION – VMI CORPS OF CADETS *2024 – Present*
Platoon Lieutenant ('26-'27) | Platoon Sergeant ('25-'26) | Squad Corporal ('24-'25)
Progressed from leading 10 cadets (direct mentorship on skills/teamwork/accountability) to overseeing 50 cadets as Platoon Sergeant/Lieutenant (accountability, discipline, operations, junior leader development). Built initiative, communication, and team leadership in VMI's rigorous environment; selected for top platoon role.
CALCULUS TUTOR ('24-PRESENT)

- Provide peer tutoring in Calculus 1 and 2, strengthening problem-solving and communication skills

RUGBY ('25 – PRESENT)

- Member of competitive collegiate rugby team, developing collaboration, and teamwork

PHYSICAL TRAINING LEADERSHIP TEAM ('25 – PRESENT)

- Lead and organize physical training sessions, promoting teamwork, discipline, and fitness
